

## Brilliant analysis of earth's current climate and ground state

Is the Multi faceted Global Crisis Reversible or Not ...

Nothing to do with CO2. It's about pressure as we burn fuels. The pressures expand and change temperatures in the mesosphere, the ionosphere and above. We are expanding our envelope which is absorbing more energy from outside. The ionosphere is 1500 degrees centigrade and getting hotter. We are being blown up like a big balloon.

The earth is collapsing as so much oil and gas has been extracted causing massive sink holes and no pressure to hold the ground up. Oil used to gush. Now we have to pump every time. After a drip of oil is burned it expands the earth's atmospheric envelope.
